PROFESSIONAL SUMMARY

AWS Cloud Engineer with hands-on experience operating and improving reliability of large-scale production AWS environments, specializing in analytics, streaming and pipelines, and search workloads across Amazon OpenSearch Service, Amazon MSK (Apache Kafka), and Amazon Kinesis.

Proven ability to troubleshoot distributed systems, lead high-severity incident response, and implement automation and recovery strategies that improve system availability, resilience, and operational efficiency.

4x AWS Certified across Associate, Professional (DevOps Engineer – Professional), and AI specializations, with SME certification in Amazon OpenSearch Service.

Experienced in on-call operations, incident management, observability, and infrastructure automation using core AWS services including EC2, Lambda, VPC, and CloudWatch.

WORK EXPERIENCE

November 2023 – Current

Amazon Web Services

Cloud Engineer – Data Analytics

- Lead meetings and calls for production AWS analytics and streaming services with OpenSearch, Kafka and Kinesis, ensuring high availability and operational resilience.
- Own high-severity incident response and service recovery under strict SLAs, performing root cause analysis and implementing preventive automation to reduce recurrence.
- Delivered global technical training on AWS Analytics services, reducing escalation rates and mean time to resolution (MTTR) by 6.3%.
- Partnered with service teams and enterprise customers to diagnose complex distributed system failures, providing architectural guidance and reliability improvements for large-scale analytics and streaming workloads.
- Designed an AI-driven log analysis automation tool for Amazon OpenSearch Service, reducing RCA escalations and improving operational efficiency.
- Contributed to internal tooling initiatives to improve monitoring, observability, and automated diagnostics across distributed cloud systems withing the Analytics workplace.
- Mentored 10+ new-hire engineers on Amazon OpenSearch Service, improving incident response consistency and response times across the EMEA region.
- Collaborated with Solutions Architects and Engineers to deliver enterprise-level Amazon Q Business GenAI workshops demonstrating real-world automation and AI integration use cases.

July 2022 – October 2023

Amazon Web Services

Cloud Associate - Data Analytics

- Managed enterprise AWS production workloads across all support severities, focusing on availability, performance optimization, and reliability improvements.
- Supported cloud-native analytics and streaming platforms including Amazon OpenSearch, MSK, Kinesis, EC2, IAM, VPC, CloudWatch, and S3.
- Replicated customer distributed environments to troubleshoot complex infrastructure and application performance issues.
- Provided architecture best-practice recommendations including monitoring strategy, scaling design, and automation opportunities.
- Performed operational reviews and quality assurance analysis to identify recurring failure patterns and implement reliability improvements.
- Assisted customers with cloud migrations, workload modernization, and capacity planning strategies.
- Advised customers on AWS architecture best practices, upgrades, and performance optimizations, improving availability, capacity, and health of analytics workloads.

ACHIEVEMENTS & RECOGNITION

Most Valuable Player (MVP) Award – AWS Engineering

Selected among top-performing engineers for consistently raising team performance standards through exceptional productivity, quality, and technical leadership. Recognized for delivering automation-driven operational improvements and leading recovery of high-severity production incidents across enterprise AWS analytics environments.

Wise Guru Award – AWS Engineering

Recognized as a key technical mentor and knowledge leader for designing and delivering structured training and onboarding programs. Mentored 10+ engineers, improving incident response effectiveness and contributing to reductions in escalation frequency.

Automation & Operational Efficiency Impact

Designed and implemented an AI-driven log analysis automation tool for Amazon OpenSearch Service that reduced manual log investigation effort and improved incident diagnosis speed across distributed production environments.

Global Technical Enablement Contribution

Delivered global training initiatives for AWS Analytics services that improved engineer troubleshooting accuracy and contributed to a measurable 6.3% reduction in MTTR across supported workloads.

Enterprise Customer Enablement & Technical Leadership

Collaborated with Solutions Architects and engineering teams to deliver enterprise GenAI workshops demonstrating real-world automation use cases, enabling customer adoption of AI-driven cloud solutions.

CERTIFICATIONS

AWS Certifications

- AWS Certified DevOps Engineer – Professional (DOP-Co2)
- AWS Certified Solutions Architect – Associate (SAA-Co3)
- AWS Certified Developer – Associate (DVA-Co2)
- AWS Certified AI Practitioner (AIF-Co1)
- AWS OpenSearch Subject Matter Expert (SME)

Networking & Security Foundations

- Cisco Networking Academy – Introduction to Cybersecurity
 - Cisco Networking Academy – Networking Essentials
 - Cisco Networking Academy – NDG Linux Unhatched
 - Cisco Networking Academy – Introduction to IoT
-

EDUCATION

2021

ADVANCED DIPLOMA: INFORMATION AND COMMUNICATION TECHNOLOGY,

Durban University of Technology

(Computer Science and Software Engineering Focus)

NQF Level 7

2018 - 2020

Diploma in ICT: Applications Development,

Durban University of Technology

NQF Level 6

SKILLS

AWS Cloud Computing Services

- **Streaming & Data Processing:** Amazon MSK, Amazon Kinesis
- **Search & AI Services:** Amazon OpenSearch Service, Amazon Kendra
- **Integration & Automation:** AWS AppFlow, AWS Lambda
- **Infrastructure as Code & Automation:** AWS CloudFormation, CDK
- **Compute:** Amazon EC2
- **Networking & Load Balancing:** Amazon VPC, Elastic Load Balancing
- **Monitoring & Observability:** Amazon CloudWatch, AWS CloudTrail
- **Security & Identity:** AWS IAM, AWS KMS
- **Storage:** Amazon S3, Amazon EBS

Automation

- Infrastructure Automation & Operational Tooling
- CI/CD Concepts and Deployment Automation
- Incident Response & Postmortem Analysis
- Monitoring, Observability & Logging Strategy

- Reliability Engineering & SLA Management
- Root Cause Analysis & Preventive Controls
- Infrastructure Performance Optimization

Programming & Scripting

- Python (Automation & Tooling)
- Bash / Shell Scripting via Linux
- Log Query & Analysis Techniques

Engineering Concepts

- Distributed Systems Architecture
- High Availability & Fault Tolerance Design
- Capacity Planning & Performance Optimization
- Operational Excellence & Continuous Improvement
- Anomaly Detection and Alerting
- Designing Pipelines and Data Processing Systems
- Reporting and Compliance within Cloud Ecosystem
